Summary: Reregistration Toxicologic Pathology

Dear Dr. Thoolen,

The committee has reviewed your application for reregistration and has concluded that you will be reregistered for another 5 years as Toxicologic Pathologist.

Reregistration will occur every 5 years and will only be approved if the Toxicologic Pathologist has remained active in the field during these 5 years.

Requirements for approval besides the daily activities within the field (can also include management activity in the pathology field) are courses, post-academic education, slide seminars, congresses and other meetings, publications or presentations.

***This letter is your certification for reregistration as
Toxicologic Pathologist until 2027***

You are CRP/TP Board Certified since: 1993
